

Financial Cryptography and Data Security '14

18th International Conference

Accra Beach Hotel and Spa, Barbados

<http://fc14.ifca.ai>

March 3-7, 2014

Call for Papers

Financial Cryptography and Data Security is a major international forum for research, advanced development, education, exploration, and debate regarding information assurance, with a specific focus on financial, economic and commercial transaction security. Original works focusing on securing commercial transactions and systems are solicited; fundamental as well as applied real-world deployments on all aspects surrounding commerce security are of interest. Submissions need not be exclusively concerned with cryptography. Systems security, economic or financial modeling, and, more generally, interdisciplinary efforts are encouraged.
